

Front End Task

We are pleased to assign you a task to evaluate your skills and expertise in Next.js and Tailwind CSS. Below are the details of the task:

****Project Overview:****

You are required to develop a small web application using Next.js for the frontend framework and Tailwind CSS for styling. The application will consist of two main pages: a login page and a profile page. Additionally, the application should include a static sidebar for navigation.

****Task Details:****

1. **Login Page:**

- Create a login page where users can enter their credentials (username and password).
- Use the provided API documentation to post the credentials for authentication.
- Display appropriate error messages for invalid login attempts.

2. **Profile Page:**

- Create a profile page that displays user information.
- Use the provided API documentation to fetch and display the user's profile data.
- Implement functionality to update the user's profile information using the API.

3. **Static Sidebar:**

- Implement a static sidebar that remains visible on both the login and profile pages.

- The sidebar should include navigation links to the login and profile pages.

****Technologies to Use:****

- ****Next.js**** for the frontend framework.
- ****Tailwind CSS**** for styling.
- ****API Documentation**** for handling login and profile data.
